

rm <file name> to remove the file.

```
ec2-user@ip-172-31-17-236 CLI_Assignment]$ mkdir backup
ec2-user@ip-172-31-17-236 CLI_Assignment]$ mv secret.txt backup/
ec2-user@ip-172-31-17-236 CLI_Assignment]$ cp notes.txt backup/notes_backup.txt
```

Phase 5: The “Extra Work” (Pro Level Commands)

grep “search_term” <file_name> to scan files line by line to match specific text expressions.

head -n X / tail -n X to quickly view the topmost or bottommost lines of text documents.

history for the indexed list of every instruction called during the active shell runtime window.

```
[ec2-user@ip-172-31-17-236 CLI_Assignment]$ grep "system" notes.txt
[ec2-user@ip-172-31-17-236 CLI_Assignment]$ echo "Linux is a type of operating system" > notes.txt
[ec2-user@ip-172-31-17-236 CLI_Assignment]$ grep "operating" notes.txt
Linux is a type of operating system
```

```
[ec2-user@ip-172-31-17-236 CLI_Assignment]$ head -n 1 notes.txt
Linux is a type of operating system
[ec2-user@ip-172-31-17-236 CLI_Assignment]$ tail -n 2 notex.txt
tail: cannot open 'notex.txt' for reading: No such file or directory
[ec2-user@ip-172-31-17-236 CLI_Assignment]$ tail -n 2 notes.txt
Linux is a type of operating system
```
